
ARCHITECTURE PORTFOLIO

About Me

What I did

My Experience

- **WHAT I DID**

The aim of today's presentation is to show you my architectural works and using relevant models, to show the different features and materials involved in my main project.

These kinds of works can be categorized at classic and modern building design, I have also used principles of Interior Design in my 3D representation. We applied Travertine stone to the classic's façade of the building and also used in inside. You can see here that there is Classic plastering on the wall and ceiling. In addition, here are some modern façade and modern interior designs I created using 3D Max. As you can see, we presented two of our villa houses planning and designing and again converted them into 3d modelling. One of their facades used Travertine stone and the other used by copper brick.

CLASSICAL FACADE

We applied travertine stone to the classic's façade building and also inside some of that

CLASSICAL FACADE

CLASSICAL INTERIOR DESIGN

CLASSIC PLASTERING ON THE WALL AND ON THE CEILING WERE DISPLAYED

CLASSICAL VILLA HOUSE

FACADES ARE DESIGNED BY TRAVERTINE

LANDSCAPE

CLASSICAL VILLA HOUSE

Facades are created by copper brick.

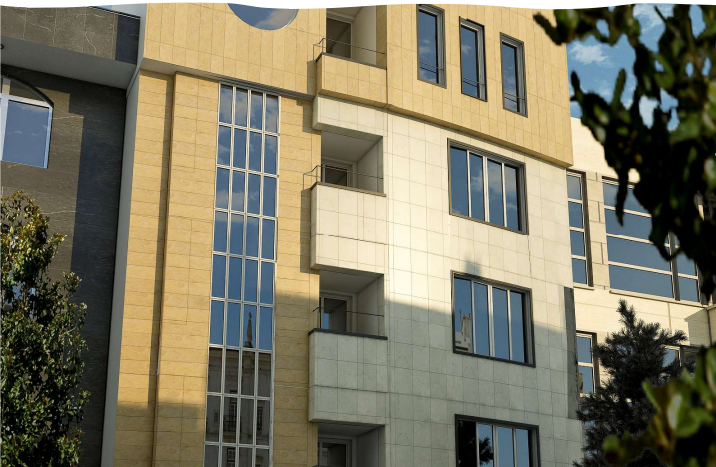

LANDSCAPE

MODERN FACADE

There are some modern façade and modern interior design which are created by 3D max

MODERN INTERIOR DESIGN

They are created by 3-D Max

- MY EXPERIENCE

- Architect in private company as a freelancer in Iran. (2008-2018)
- Interior designer for several houses and complex residences.
- Specialized in architectural design in interior architecture and real Estate.
- Working mainly in drawing and designing by AutoCAD across residential projects.
- 3D-modelling by 3-D Max across interior design.

Thank you for listening
I would appreciate your thoughts and
questions.
